# Wainaina Gathecha

Frontend Engineer

Nairobi, Kenya | wainainagathecha@gmail.com | github.com/WainainaGathecha | my-portfolio-p2xe.vercel.app

---

## PROFESSIONAL SUMMARY

I am a highly professional, product-focused Frontend Engineer specializing in turning complex data structures into seamless, performant and high-conversion web applications. With a full-stack foundation, I engineer web architectures that are fast, accessible and highly scalable. I am an exceptional technical communicator bridging the gap between complex engineering realities and business stakeholding - translating technical constraints into plain, actionable concepts for non-technical clients.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
**Frameworks & Libraries:** Tailwind CSS, React, Vite
**Tools & Workflow:** Git, GitHub,
**Concepts:** DOM manipulation, data-driven rendering, responsive design, component-based architecture, REST API integration, Core Web Vitals optimization, SEO & meta tags, accessibility fundamentals
**Soft Skills:** Client communication, Project Scoping, Rigorous Documentation standards, Self-Drive

## Featured Live Production Project

**Smart Kings Auto Tyres — Client Website** smartkingsautotyres.co.ke *2025*

**Stack:** *Vanilla JavaScript, Tailwind CSS, HTML5, CSS3*

- Built and shipped a full production website for a tyre shop in Nairobi, managing the project from design conception through deployment and client handover
- Built a tyre catalogue system with multi-criteria product filtering and data-driven rendering patterns.
- Integrated WhatsApp pre-filled message links on all product enquiry CTAs, enabling direct customer to business conversion without a contact form.
- Optimized mobile Core Web Vitals: improved performance score by eliminating 2,210ms of render-blocking time - deferred Fonts and Icon libraries, added preconnect hints and inlined critical CSS.
- Configured full SEO setup: canonical tags, Open Graph and Twitter Card meta pointing to the custom domain; resolved Vercel deployment URL leaking as canonical

## Featured Engineering Projects

**CineWatch:** https://cinewatch-green.vercel.app/ *2026*

**Stack:** *React, Tailwind, JavaScript, TypeScript, Vite*

- Built a movie discovery app with search, trending, and detail views, consuming the TMDB API through a decoupled Express backend that proxies and caches requests
- Architected frontend and backend as independently deployed services communicating via REST
- Implemented loading skeletons and error states to eliminate blank -screen flashes during data fetching, improving perceived performance on slow connections

## ADDITIONAL

Actively learning emerging frontend technologies and building toward full-stack capabilities. Comfortable working independently, communicating async, and shipping on time. Available for remote work globally.
